

CHRISTIE'S KITCHEN & BATH

Getting Started

To start the process of remodeling your kitchen or bath we will need to collect some information! In order to get you a quote for what the project will cost we will require measurements for the space and preliminary selections for what products you would like to use in your space. Give us a call at 941-375-8611 so we can discuss the work you are looking to do and help point you in the right direction. We can make an appointment over the phone to come out and take measurements, or if you prefer you can follow the directions below and take your own measurements! To start the process of making your selections you can take a look at our Explore Your Options page and see the different products we offer! You can also use the calendar on this page to schedule a video conference, during which we will discuss your project and go through your options together!

Guide to Measuring Your Kitchen!

Tools Needed:

- A Tape measure
- Pencil
- Paper
- Electronic Device that can Take Pictures

Measurements Needed:

- Length of each wall in the room
- Height to soffit or ceiling depending on if soffit is present; if you would like soffit removed we will need the height of the soffit and the ceiling height
- Distance from end of cabinets or wall to the center of your sink
- Location of all existing appliances
- Note the location of existing switches and outlets
- If an Island is present, distance from perimeter cabinets to island cabinets and size of the island cabinets
- If there are any door ways, windows, or pass throughs on the same walls as the cabinets include the height and widths of those. For windows and pass throughs please also measure the distance from the floor to the bottom of the opening or sill

Tools Needed:

- Make a basic sketch of the room showing the view as if you were looking down from above
- Start at one end of the room and work your way around, writing down your measurements as you go
- On this sketch you can write the lengths of the walls, draw appliance locations, and sink location. You can also mark the locations and sizes of any doorways, windows or pass throughs.
- Please ensure you write clearly so that we are able to read your notes!
- Take pictures of the space that you can send along with your measurements to give us a better visual of the room. Include pictures of the plumbing under the sink.
- Once you have gathered all of this information please send an electronic copy to William@christieskitchens.net and include your name, phone number, address, and a description of what you would like to do in the email
